3 billion people do not receive the health services they need

Nearly 100 million people are impoverished by the cost of healthcare

HIV infections are 44% higher among young women, ages 15 to 24, than they are among young men in the same age range

Vaccinating adolescent girls against the human papilloma virus (HPV):

Implementing recommended interventions for noncommunicable diseases (NCDs) prevention and control in low- and lower-middle-income countries:

Health for all through universal health coverage

Universal health coverage that includes sexual and reproductive healthcare and NCDs care

People-centered care, with a focus on all girls and women

Robust and well-trained health workforce that is accessible for all

Healthy girls and women are the cornerstone of healthy societies. Provide girls and women access to health throughout their lives and they will deliver a healthier and wealthier world.

**Eliminate legal, financial, social, and institutional barriers** that prevent access to comprehensive health services for all girls and women.

**Set and meet national targets** across girls’ and women’s health and wellbeing needs — including sexual and reproductive health, as well as communicable and noncommunicable diseases.

Focus efforts towards more integrated, **women-centered healthcare** to address the needs of girls and women along the life cycle.

Build the capacity of health workers and **address health worker shortages** and general wellbeing, particularly in rural and underserved areas and in emergency and conflict settings.

**Build and disseminate evidence** of the impact of women-centered care.

**Invest in strong national information systems** and implement legal frameworks for privacy protection.

Promote **girls’ and women’s involvement in sport** as a critical way to foster wellbeing and healthy behaviors.

**ASKS**

**RIPPLE EFFECT**

- Healthier populations
- More lives saved
- Stronger economies
- More efficient health systems
