

# **WOMEN DELIVER**

## **THE LEBANON FAMILY PLANNING ASSOCIATION FOR DEVELOPMENT AND FAMILY EMPOWERMENT HUMANITARIAN ADVOCATES PROGRAM**

The **Lebanon Family Planning Association for Development and Family Empowerment**, LFPAGE, is the first and oldest family planning association in Lebanon working to expand access to reproductive health services and information throughout the country.

## OUR APPROACH

We know access to family planning and sexual and reproductive health services benefits girls and women, and in turn improves their lives and futures as well as those of their families and communities. We work through a holistic approach to provide:

- **Health services**, including family planning services and counseling, referrals and awareness/outreach sessions;
- **Economic empowerment**, including life skills and vocational training;
- **Political participation**, including leadership and participation training to influence local and municipal decisions.

## OUR ASKS

Despite progress, there remains gaps and challenges to greater access to comprehensive sexual and reproductive health services and information. The international humanitarian community, together with local partners, should work to:

- Improve access to SRH services in underserved, rural communities and hard to reach areas.
- Ensure the full range of SRH services are available and of quality.
- Increase flexible and long-term investments in local SRH providers who are experts on the context and communities in which they work.
- Prioritize integrated and effective programs that benefit all aspects of the lives of girls and women.
